

Blink Payment's integration with **stripe**

Blink Payment's integration with Stripe is a great way to get your payments up and running really quickly. It also gives you a seamless and secure solution to accept payments through multiple channels, like sending payment links, and even adding payment pages to your website.

How does the integration work?

24/7 payment acceptance

You can accept round-the-clock payments, by using hosted payment pages on your website and sending out payment links, like via SMS.

UK customer support

Benefit from our UK-based customer support, which is available to help with any queries within working hours.

Effortless refunds

Issue refunds with just a few clicks directly from the reporting page, simplifying the process, and improving your customer satisfaction.

Payment reporting

See real-time payment reporting in our payment platform, like complete and pending transactions. You can run reports too.

Flexible payment types

Your customers choose between multiple payment methods:

- Phone payments (virtual terminal)
- Online: payment links and web pages enabling card payments, open banking, Direct Debit, Apple Pay & Google Pay

Customisation

Add your own branding to payment webpages, to create a personalised customer experience. You can even adjust the functionality of the payment platform to your own requirements.

Why use our integration with Stripe?

Speed

It's a really quick way to start taking payments. Once you connect your Blink Payment and Stripe accounts, you can immediately accept payments!

Compliant and secure

Stripe manages Anti-Money Laundering (AML) compliance and underwriting in the background. A branded PCI-compliant payment page with 3D Secure authentication also ensures your customers pay safely online – protecting you from chargebacks.

Enhanced accessibility

Seamlessly manage transactions across both Blink Payment and Stripe. You can easily switch between processors, while still viewing all payments in one place.

Convenience

Take payments without needing to call your customers. Benefit from automated reminders and receipts and reporting, saving you time.

Control

See a summary of a payment's journey, plus detailed reporting of customer payment and financial performance.
