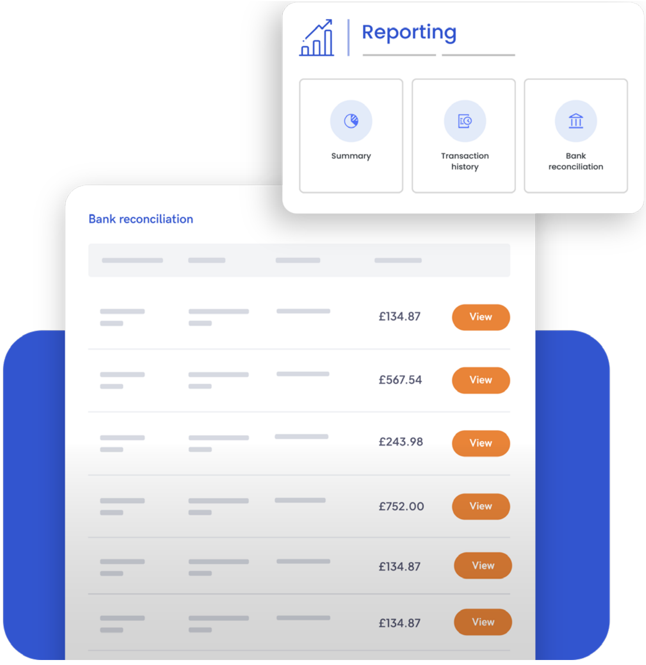
blink payment



Reporting

Blink Payment's reporting tools help you focus on growing your business by giving you clear, real-time insights into all your transactions. Track payments, monitor team performance, and reconcile transactions effortlessly – all in one place.

Why use reporting?

- **Transaction insights:** Instantly see the status of successful transactions, helping you stay in control of cash flow.
- **Dedicated reporting pages:** Access separate pages for card, open banking, and Direct Debit transactions for detailed tracking.
- **Up-to-date reconciliation:** Match processed payments with received funds quickly and easily, reducing admin time.
- **User activity tracking:** Track employee-initiated transactions, providing greater oversight and accountability.
- **Custom and automated reporting:** Filter payment data by different parameters including user, status, transaction ID, and payment method. Schedule reports and export them instantly as a CSV to always stay up to date.
- **Flexible access controls:** Manage employee access so team members only see data for the transactions initiated within their business entity.

- **Extended control:** Comprehensive CSV reports with detailed payment information including timestamps for when the transactions were created and processed can be scheduled daily, weekly or monthly, giving you full control over your financial health.
- **Usability:** Our reporting function is intuitive and simple to use, requiring no technical knowledge.
- **Real-time insights:** Monitor transaction success instantly to see exactly what's heading to your bank.
- **Transparency:** You can easily access all funding details, giving you a complete picture of every transaction and helping identify trends to make data-driven decisions.
