

xero Accounting Software Integration

Our payment platform supports full integration with Xero accounting software.

Payment integration will enable your business to send invoices, receive payments, and reconcile any transactions in the Xero platform. Once a transaction is successful, the Blink Payment platform automatically sends the details to the bank feed in Xero, where your invoices can be reconciled.

How does Xero integration work?

'Pay Now' button

Enable your customers to pay instantly by adding the "Pay Now" button to your Xero invoices. Once setup, all the invoice details will be automatically pre-filled on the payment page.

Reconciliation

Reconcile all payments easily, with our platform automatically matching transactions to invoices based on name, reference, and amount.

Customisation

Customise your invoices and payment pages with your company branding, providing your customers with a simple, familiar, and professional user experience.

Multiple payment methods

Give your customers more choices by accepting multiple payment methods like card, open banking, Direct Debit, Apple Pay and Google Pay.

Why use Xero integration?

Improved data accuracy

Pre-filled payment pages reduce the chance of errors, making reconciliation simple and accurate. All payments appear in the Xero bank feed, allowing collective reconciliation regardless of payment option.

Enhanced security

All online payments are 3D Secure and PCI compliant, reducing the risk of fraud against you or your customers. As transactions are completed on a hosted payment page, there is also increased protection from chargebacks.

Time saving

Adding a 'Pay Now' button to your invoices and sending them directly from Xero makes it quick and easy for customers to pay and means less time chasing payments.

Seamless financial management

All transaction data is automatically synced with Xero, giving detailed financial insights, and assisting with decision-making. You can manage invoicing and reconciliation without leaving Xero.

Superior customer experience

Pre-filled payment pages and a fully integrated system result in a continuous payment journey from start to finish, offering your customers a hassle-free experience.
