

The Blink Payment Platform

Our platform is the central point for all your financial operations, allowing you to take payments, track, and report on them quickly and securely.

The platform offers complete integration with all major UK acquirers and many across Europe, providing you with a seamless payment system without disrupting existing provider arrangements.

How does our platform work?

● Round-the-clock payment

Accept payments 24/7 via payment links and hosted payment pages.

● Flexible payment methods

Let your clients choose the convenient way to pay:

- In-person (via card machine)
- Over the phone (via virtual terminal)
- Online (payment pages and payment links utilising cards, open banking, Direct Debit, Apple Pay & Google Pay)

● Reporting

Get detailed insights on customer activity (like whether a transaction is pending or complete). You can also automate reports and payment reconciliation, by integrating with Xero or QuickBooks.

● UK customer support

Benefit from UK-based customer support, which is always available to help with any queries within your work hours.

● Customisation

Add your own branding to create a bespoke customer experience and adjust the functionality of the platform to your own requirements.

Why use our platform?

Easy and quick

No need to sign up with a new acquirer so onboarding is fast and simple.

No Anti Money Laundering (AML) checks

Since you're staying with a current acquirer, there is no need to pass any regulatory financial checks again.

Time saving

Take payments without needing to call the customer. Benefit from automated reminders and receipts, plus streamlined reporting – saving you time.

Enhanced security

A branded PCI-compliant payment page with 3D Secure authentication ensures your customers safely pay online while protecting you from chargebacks.

Extended control

Summary of a payment's journey and detailed reporting provide you with data on business performance and internal processes.

Flexibility

There are multiple payment methods and you can tailor the appearance of the platform to your requirements.
