Accounting Software Integration

The Blink Payment platform supports full integration with QuickBooks accounting software.

This integration will enable your business to send invoices, receive payments, and reconcile any transactions in the QuickBooks. Once a successful transaction, our platform sends the data back to QuickBooks, where your invoices are automatically reconciled.

## How does QuickBooks integration work?

### Blink Payment page

Enable your customers to pay instantly by adding a link to the Blink Payment page to your QuickBooks invoices.

### Automatic reconciliation

Reconcile all payments easily, with our platform automatically feeding back transactions to QuickBooks for reconciliation based on name, reference, and amount.

### Customisation

Customise your invoices and payment pages with your company branding, providing your customers with a simple, familiar, and professional user experience.

### Multiple payment methods

Give your customers more choices by accepting multiple payment methods like card, open banking, Direct Debit, Apple Pay and Google Pay.

## Why use QuickBooks integration?

### Effortless integration and use

Seamlessly incorporate the payment page link into your QuickBooks invoice template with a simple copy-and-paste.

### Enhanced security

All online payments are 3D Secure and PCI compliant, reducing the risk of fraud against you or your customers. As transactions are completed on a hosted payment page, it adds an extra layer of protection from chargebacks.

### Time saving

Adding a payment page link to your invoices, sending them directly from QuickBooks, and reconciling transactions automatically make it quick and easy for customers to pay and means less time chasing and matching payments.

### Seamless financial management

All transaction data is automatically synced with QuickBooks, giving detailed financial insights, and assisting with decision making. You can manage invoicing and reconciliation without leaving QuickBooks software.

### Superior customer experience

Branded payment pages and a fully integrated system result in a continuous payment journey from start to finish, offering your customers a hassle-free experience.
